Professional Training Equipment

## SPACES TO INSPIRE. EXPERIENCES TO REMEMBER.

WATERROWER | NOHRD brings high-quality training to exclusive environments such as hotels, spas, yachts, corporate spaces, and private clubs. Our fitness solutions combine precise functionality with timeless design and integrate seamlessly into sophisticated architectural settings.

Whether in a boutique hotel, spa suite, or on a yacht, NOHRD fitness solutions are quiet, space-saving, and versatile. Strength, cardio, and functional training can be combined in a modular way, making them ideal for limited spaces while maintaining a high standard of training quality.

## CARDIO

Our Cardio Equipment combines performance-driven engineering with refined architectural aesthetics.

Crafted from premium wood and high-quality components, each machine is designed for smooth, natural movement and long-lasting durability in professional and high-end residential spaces.

Compact proportions, quiet operation and a distinctive design language make the collection a seamless addition to sophisticated training environments.

# FUNCTIONAL

Our Functional Equipment brings versatility and refined craftsmanship to modern training spaces.

Designed for bodyweight, mobility and free-weight workouts, the collection combines premium wood finishes with intelligent storage solutions and compact footprints.

Seamlessly integrating into studios, hospitality and residential environments, NOHRD Functional supports dynamic, full-body training with clarity, efficiency and timeless design.

## GROUP TRAINING

Our Group Training solutions are designed to elevate collective performance within refined architectural spaces.

Combining aesthetic consistency with commercial durability, the equipment supports synchronized, high-energy workouts while maintaining a calm, design-driven atmosphere.

Modular setups, efficient space planning and premium materials create motivating environments that seamlessly unite movement, community and timeless design.
