1 EMBROIDERY

Personalise your equipment with embroidery crafted in our workshops.

Company logo, initials or signature phrase: every design is faithfully reproduced on leather using premium threads, for a luxurious and long-lasting finish.

2 LASER ENGRAVING

Laser engraving etches your design directly into the cork with sub-millimetre precision. Ink-free and flush with the surface, it reveals the raw texture of the material for an elegant, permanent and distinctly natural signature.

3 PRINTING

Reproduce even your most complex visuals on cork with high-definition printing. Perfect for multicolour logos, gradients or photographs, this technique delivers a vivid, photo-quality result directly onto the surface of the material.

PALOMA LEATHER

PALOMA leather is elegant, smooth and timeless. It's a slightly corrected semi aniline leather with a warm and soft touch. Semi-aniline leather is a lightly sanded leather that is supple and soft, with an elegant look. The leather may be lightly patterned or retain its natural grain, which is slightly stronger than with full-grain semi-aniline leather. Sitting comfort remains high, as the ability of the leather to breathe is partially preserved.

PALOMA leather is free of chrome and produced without PCP and CFC and fulfils the requirements according to BS5852 CRIB 5.

YA'FABRIK **PALOMA** comes in 60 selected colours, in order to best match your design taste.

ALVA LEATHER

The leathers with reference 20017 and 20104 (2068) are soft and pliable semi-aniline-leathers. Outstanding comfort combined with excellent durability and an extensive shade card, makes it very suitable for the public environment.

Visible insect bites and scars from healed wounds, add to the genuine character of the leather.

TECHNICAL SPECIFICATIONS

Raw material : Grain leather from Scandinavian cattle
Thickness : 1,1-1,3 mm

The leather is dyed and tested at the tanneries' laboratory. A hide is selected at random from every batch of finished leather and checked in accordance with the following:
